a fine day starts after a restful night

Meet with KING KOIL

One of the most important factors of healthy sleep and healthy life is regular and comfortable sleep that banished continuously through the night. For a regular sleep experience, it's important for you to organize your time for sleep in a correct way. If you make this a routine, your body also gets accustomed to the sleep cycle and it gets easier for you to stay in sleep when you go to bed in the nights. You to make your bedroom special for the sleep is also one of the factors that effects the healthy sleep. If your bedroom is quite and dark, it will be easier for you to fall asleep and have a continuous sleep. At the nights, at the time of the sleep, if you abstain from food, alcohol and caffeine and make comfortable to your body by making exercises in place of these, you experience both a healthy life away from stress and comfortable sleep period.

Most important factor for sleep:

Your bed: besides the environmental factors that you can create for sleep, most important thing that will take you to a comfortable sleep and healthy day is your bed. Your bed has to be as comfortable as to prove you to fall asleep easily and has be have been created as to take the correct position when you are sleeping and supporting your body from every direction. So that, you can have a continuous sleep experience and rest your body, get away from stress and by the comfortable that is proved by your bed get out of your pains and start to the day full of energy and happy. King Koil collection, by having the most qualified materials given by the technology such as from horse hair to latex sponge layers, from pocked spring system to visco elastic materials, meets you with a healthy sleep experience and together with its brilliant creation, perfect craftsmanship and visual richness that will make you feel in dream even you have woke up, adds color to your life. All of the materials that are used at the King Koil bed collection have been chosen diligently for you to have more healthy sleep experience and have been submitted to your favor in 4 different bed choice of perfect combination: Rose, Continental, Savoy and Amethyste.

King Koil beds that are perfect at all, not only promising a healthy sleep or fine view but also a perfect experience at a collection that has not been seen before that both of these two specifications are joining together.

* Latex

Mattresses produced with latex material help you to have a more comfortable sleeping experience by distributing the pressure equally to whole mattress while you are sleeping. The latex filled King Koil mattresses offer you a peaceful sleeping experience with its latex material which is produced by durable and natural rubber that you can use for years healthfully.

** Pocket Spring System

The Pocket Spring System is produced by combining the individually springs in an interconnected pockets. by means of this partners can sleep continuously without effected from the movements of each other. 260 pcs of springs which exist in one square meter support the body in best way and besides this it is two times durable than the standart springs.

It is determined that the human body pressure the mattress on 5 different zones and the pocket spring system supports the body in best way with it's structure with 5 different degrees of hardness and regulates the blood flow and minimize the involuntary movements.

CASALETTO
Headboard & Box

To make a good start for a day,
your mattress has to support
you fully for a relaxation during
8 hour good night sleep.

excellent combination of
HORSE HAIR

air is everything...

In order to protect the heat balance
of our body, we need air as much as
water.

Our body sweats all day long in order
to keep this balance and to provide
the heat balance by evaporating the
sweat thanks to the air circulation.

Our body needs the same process
throughout the night because while
we sleep our body sweats off an
amount between a half to one litre.

To sweat off properly, the place that
we spend the night should have a
very good air circulation.

Our mattress is one of these.

why horse hair?

In order to create an ambiance as
spacious as in the day time and to
protect the heat balance of the body
all night long, the mattress should
realize the air circulation. To realize
this circulation, various materials can
be used in our mattresses.

Horse hair is a very good material
realizing this task of air circulation of
the mattress. The foam layers soaking
the sweat immediately, convey the
fluid to a layer made of horse hair.

The horsehair has a structure that
provides an immediate evaporation
by expanding the area where the
fluid is diffused and forms a natural
and a perfect aeration system in the
mattress.

This natural and perfect evaporation
system will make you feel as if you're
on the clouds and will help you start
a nice day by providing a healthy
sleep.

Since the horse hair is a natural and
organic material, it may not form a
smooth surface and it may not easily
regain its original form in case of
pressure. So this causes an imperfect
surface while using the mattress.

However, this difference of
appearance does not cause any
damage or loss in the natural
structure of the horse hair. Horse
hair can realize its task of providing
the air circulation of the mattress for
many years.

We produced Amethyste
for the one third of your life
and day to be healthy and
comfortable and in order for
you to spend the rest of the
day happily.

Enjoy it...

Mattress
CONTINENTAL

Headboard & Box
CHATEAU

Color; Quatro 02

Mattress CONTINENTAL

Our R&D was in pursuit of the comfort formed by air-permeable, perfect springing for a long time. With the cotton linen fabric, double sided topper, and pocket spring, they have found exactly the comfort in demand.

Name of the comfort: Continental mattress.

Maximum Air Circulation with Cotton Linen Fabric

Cotton and linen, gifts of nature for us, have met technology, and a unique fabric has emerged. Air circulation has reached to maximum level by means of fibrous structure forming between cotton and linen mixture. Ventilation potential of the mattress helps the body to preserve heat balance. It minimizes the sweating.

Perfect Springing with Double Sided Topper

Both sides of the double sided topper, produced with extra soft HYP filling material and combined preciously by hand-workmanship, have different functions. Topper on the upper side facilitates best adaptation of upper filling material to body. It minimizes the influence of body from turns during sleep and commits an uninterrupted sleep all night long. Mattress does not resist to body movements because upper filling material is separated with topper.

Lower topper supports flexible structure of the mattress by giving the sensation of spring box. It strengthens the feeling of springing. It could be used as double-sided.

- 1 Cotton fabric
- 2 150 gr/m² silicone mixed fiber
- 3 17 mm Super Soft HYP foam
- 4 30 gr/m² interfacing
- 5 24 mm Soft foam
- 6 1000 gr/m² felt
- 7 1,6 / 1,8 mm wire diameter, 5 zones, 260 pcs/m² coil counts stainless steel Pocket Spring System
- 8 Frame foam: firm foam
- 9 15 gr/m² interfacing
- 10 12 mm AG foam

5 zone Pocket Spring System
Double side pillow top
Ticking by natural fibers
Heavy duty pocket spring core

Independent Movements with 5 Zone Pocket Spring System

Partners are not affected by movements on mattress by Pocket spring system composed of springs placed in packages independent from each other. With the spring system having 5 zones i.e. 5 different hardness levels, your mattress gives different responses to 5 different zones of the body. This helps to balance the blood pressure. It decreases number of turns during sleep. It protects the natural slope of the spine.

Headboard & Box CHATEAU

The winner is not always the technology.
We have to feel also the comfort of hand
made in our life...

...in the proficiency of habits
coming from the past...

Mattress
SAVOY

Set
ASPEN

Color; Chesterfield Alaska

Mattress SAVOY

It is a combination to change your habits with its topper generated with special techniques on Pocket spring support and its special fiber fabric. It invites for you to experience different feelings!

Get ready for the comfort with Tactel Fiber Fabric!

Its specially-patterned fabric is woven with Tactel fiber. Within daily hours of sleep, body discharges a certain amount of moisture. Tactel fiber absorbs this moisture very quickly and eliminates very quickly as well. This process prevents body from feeling discomfort due to moisture and provides sound sleep all night. It reduces sweating. It also makes your mattress ventilated.

Call for a Different Sleep Experience with its Special Topper!

The topper facilitates your mattress's adaptation with your body. Thanks to the fillings used in the topper, the mattress wraps you without showing any resistance to your body's weight. Each body structure feels the necessity to turn at different numbers of times during night's sleep. In case that your mattress does not adapt to your movements during these turns, then your sleep is interrupted and REM phase shortens. If such an adaptation does not realize, even long hours of sleep do not make you feel rested. With the topper produced with some sponges with different characteristics at the same thickness by using some of our own techniques; Savoy mattress invites you for a different sleep experience.

Independent Movements...

Pocket spring is composed of 20-cm-high springs placed in packages independent from each other. Independent structure of springs allows partners to sleep without being affected by the other's movements on mattress. Height of 20 cm facilitates adaptation to the anatomic structure of the body with the best springing movement.
